WORK EXPERIENCE

Software Developer Intern
Asseco Software Nigeria Limited

03/2024 - Present

- Led the development of a comprehensive School Management System, improving communication and interaction between parents, teachers, and administrators, which resulted in increased engagement and efficiency in managing school operations.
- Designed and implemented key functionalities such as student attendance tracking, and grade viewing, ensuring a user-friendly experience across multiple devices and platforms.
- Prioritized system scalability, security, and usability to support high-volume data management, enabling seamless access to student information and reports while maintaining robust protection of sensitive data.

SKILLS

- Programming Languages:** HTML5/CSS, JavaScript, NodeJS
- Frameworks & Libraries:** React, Express, Prisma, Sass, Tailwind CSS
- Databases:** MongoDB, PostgreSQL, Firebase
- Tools & Hosting Platforms:** Visual Studio Code, Git, Microsoft 365, Postman, Vercel, Render

EDUCATION

LAGOS STATE UNIVERSITY: Lagos, Nigeria

Bachelor of Science in Computer Science

CGPA: 4.30

PROJECTS

School Management System | React and Node.js (PostgreSQL)

- Developed and deployed a scalable system enabling real-time interaction and communication between school stakeholders, supporting features like grade tracking, online payments, and student information management.
- Ensured high system compatibility across devices, integrating tools and technologies such as React, Node.js alongside Express.js, and PostgreSQL alongside with Prisma ORM to optimize performance, usability, and security.

Adore Jewelries | MERN

- I developed a comprehensive full-stack jewelry website, incorporating all standard functionalities, including user-registration/login, product listing, shopping cart. Implemented responsive design for optimal user experience across various device.

Youtube Clone | React and Material UI

- Developed a YouTube clone that allows users to search for and stream videos in real time, utilizing Axios for API requests and RapidAPI for video data retrieval.
- Implemented a modern, responsive UI using Material UI, ensuring seamless user experience across devices while maintaining clean and intuitive navigation.

Decentraland Clone | Next.js

- Developed a single-page clone of the original YouTube website, adhering to SEO best practices and ADA compliance for improved accessibility and search engine visibility.
- Integrated Google Sign-In authentication using Firebase, providing a secure and seamless login experience for users.
